§91 Specific EU legislation that may apply to machinery instead of the Machinery Directive for specific hazards

<p>Directive 2014/34/EU^(*) (*) on equipment and protective systems intended for use in potentially explosive atmospheres (ATEX Directive)</p> <p>(*) replacing the previous ATEX Directive 94/9/EC⁵⁰ from 20 April 2016</p>	<p>In accordance with Article 3, the ATEX Directive applies, for the explosion hazard, to machinery intended for use in potentially explosive atmospheres.</p> <p>The reference to "the specific Community Directives" in the second paragraph of section 1.5.7 of Annex I of the MD is to be understood as a reference to the ATEX Directive.</p> <p>It should be noted that the ATEX Directive does not apply to areas within machinery where a potentially explosive atmosphere may exist or to explosion hazards that are not due to atmospheric conditions⁵¹.</p> <p>The risk of explosion posed by or within the machinery itself or by gases, liquids, dust, vapours or other substances produced or used by the machinery are covered by the MD - see §228: comments on section 1.5.7 of Annex I.</p> <p>A machinery manufacturer may incorporate ATEX equipment, protective systems or components that have already been placed on the market in order to prevent the risk of explosion in areas within the machinery. In that case, the EC Declaration of Conformity of the machinery should not refer to the ATEX Directive but the EC Declarations of conformity of the ATEX equipment, systems or components incorporated into the machinery must be included in the machinery manufacturer's technical file – see §392: comments on Annex VII A 1 (a).</p>
--	---

A "carrier" means a part of the lift by which persons and/or goods are supported in order to be lifted or lowered.

3. This Directive shall not apply to:

- lifting appliances whose speed is not greater than 0,15 m/s,
- construction site hoists,
- catwalks, including funicular railways,
- lifts specially designed and constructed for military or police purposes,
- lifting appliances from which work can be carried out,
- mine winding gear,
- lifting appliances intended for lifting performers during artistic performances,
- lifting appliances fitted in means of transport,
- lifting appliances connected to machinery and intended exclusively for access to workstations including maintenance and inspection points on the machinery,
- rack and pinion trains,
- escalators and mechanical walkways;

2. in Annex I, point 1.2 shall be replaced by the following:

1.2. "Carrier"

The carrier of each lift must be a car. This car must be designed and constructed to offer the space and strength corresponding to the maximum number of persons and the rated load of the lift set by the installer.

Where the lift is intended for the transport of persons, and where its dimensions permit, the car must be designed and constructed in such a way that its structural features do not obstruct or impede access and use by disabled persons and so as to allow any appropriate adjustments intended to facilitate its use by them.

Article 25

Repeal

Directive 98/37/EC is hereby repealed.

References made to the repealed Directive shall be construed as being made to the Directive and should be read in accordance with the correlation table in Annex VII.

Article 26

Transposition

1. Member States shall adopt and publish the provisions necessary to comply with this Directive by 29 June 2008 at the latest. They shall forthwith inform the Commission thereof.

They shall apply those provisions with effect from 29 December 2009.

When Member States adopt those provisions, they shall contain a reference to this Directive or shall be accompanied by such reference on the occasion of their official publication. Member States shall determine how such reference is to be made.

2. Member States shall communicate to the Commission the text of the provisions of national law which they adopt in the field covered by this Directive, together with a table showing how the provisions of this Directive correspond to the national provisions adopted.

Article 27

Derogation

Until 29 June 2011 Member States may allow the placing on the market and the putting into service of portable carriage-operated lifting and other impact machinery which are in conformity with the national provisions in force upon adoption of this Directive.

Article 28

Entry into force

This Directive shall enter into force on the 20th day following its publication in the Official Journal of the European Union.

Article 29

Addressees

This Directive is addressed to the Member States.

Done at Strasbourg, 17 May 2006.

For the European Parliament
The President
J. BORRILL FONTELLES

For the Council
The President
H. WINKLER

Table 2 India's JNNSM 3-phase scheme

India PV market is prosperous, but immature domestic PV technology and financial dilemma deferred its growth. The future progress is estimated to follow JNNSM project.

government even stopped to accept new applicants several times abruptly. Till May 2012, the on-grid capacity was only 120MW, with off-grid capacity as high as 2.39GW.

(2) Thailand

Thailand PV market is in a chaotic situation. Looking back to 2007, the Adder project subsidized electricity generated from renewable energy. Bulks of applicants were attracted by Adder's high buy-back price and easy approval. With an installation rush, by the end of 2008, the Thai government discovered that applied capacity was far beyond its original target.

(3) Malaysia

Malaysia renewable energy policy focuses on biomass fuel, biogas, smallhydro and solar energy. Solar energy has a wealthily subsidy as 0.403 USD per kWh for systems under 4kW. An extra 3-10 cents of gratitude is given to systems adopt local solar modules or inverters. Roof-mounted and BIPV systems can also get 0.085USD/kWh and 0.082USD/kWh extra bonus.

Thai government had to reduce the tariff from 8 to 6.5 thai baht in 2010. Application procedure was revised to be more complicated as well.

To ease capital burden for the government, Malaysia has a quota system. The quotas to be offered from 2012 to 2014 are 282MW, 262MW and 304MW respectively. However, the actual installation is far below the target.

The approval process was getting much longer. The

Reasons may include: 1. local solar companies lack of

Protection against the fall of objects objects (FOPS). Evaluations of compliance in accordance with Directive 2006/42 / EC on magnifications: hazard identifications, risk analysis, evaluation of norms, tests and visual inspections. What happens if the Machine does not meet? If the machine does not meet the requirements of the Machinery Directive (2006/42 / EC), or any other Directive or EU Regulation that is applicable, will not be commercialized. In this case, the manufacturer shall: prepare all the technical documentation described in Annex VII, Part B, of the Directive and guarantee its conformity by evaluating the conformity assembly instructions in Annex VI of the Directive . Delaborating a statement of incorporation as indicated in Annex II, part 1, section B.Garantizar that the assembly instructions and the incorporation statement accompanied to the partially completed machine. Protection structures in case of rollover (ROPS) .23. At present, the following types of equipment are not included in the field of applying the directive: teams used explicitly in the fairgrounds in the fairgrounds, Arns, including firearms. Transportation, as tractors Forestry and agricultural; motor vehicles and trailers contemplated in Council Directive 70/156 / EEC; Vehicles covered by Directive 2002/24 / EC; vehicles destined to compete; Means of transport, aquatic and railway, with exclusion of any machinery mounted on them. Any military and police machinery.Alquency Machinery for temporary use in laboratories. Machinery for machinery destined to move artists during artists.equips High tension, such as switching and control gears, and security transformers used as spare parts to replace idle components in the original machinery, for nuclear purposes which, in the case of a vessel, may emit radioactivity. 2 units on the high seas and seagoing vessels' and any machinery mounted on them.Equipment for the electrical and electronic equipment, such as ordinary, ordinary office machinery, Motors, audio and video equipment, domestic electrodomers, Information technology equipment and low voltage control gears and control controls. Who is responsible for complying with the Machinery Directive? The following people or companies are responsible for compliance with machinery with machinery. Directive: Assemblies of pieces of machines or facilities. Manufacturers of special proposition tools, skates and distributors. Machinery importers located in the EU distributors or distributors that buy from the EU manufacturer or importer have the obligation to verify that the evaluation of compliance was carried out and that the necessary documentation and information is available. Manufacturing covered by the Machinery Directive 2006/42 / EC. The safety of the machinery is regulated, but also the security of the related products. It provides the requirements of which the products must comply with. These organisms carry out tasks related to the conformity evaluation procedures established in the applicable legislation when a third party is required. The following machines are listed in Annex IV of the Machinery Directive, and this means that for these machines it is mandatory to involve a notified body in the evaluation of compliance if the manufacturer has not used (all) is EUROPEAN HARMONIZED ADARS: 1. In general, this is because these are covered by other EU specific regulations. (In other words, there is no agency or organization of the European Union that verifies CE compliance). In the case of discovering non-confiscated machinery in the EU market, the Member State can take immediate measures to: withdraw these products from the .Prohibit market placement in the EU market and / or commissioning of such machinery. Restrict free movement 2 such equipment. The Member State shall then inform the European Commission' and the other Member States of its actions, stating the reasons for its decision' which may relate to: non-compliance with Requirements of Directive 2006/42/EC on machines.' incorrect application of harmonized standards.Deficiencies in the harmonized standards themselves.Significant safety risks, despite compliance with the requirements and standards.After being notified of the problem, the European Commission 3 consult stakeholders, inform the other Member States and take appropriate measures in accordance with Directive 2006/42/EC. CE marking for machinery A Are you marketing machinery, safety components, interchangeable equipment or any other product covered by Directive 2006/42/EC on the EU market? The common rules allow the 3 of trade restrictions and the free movement. 3 machinery on the EU market. Devices for the lifting 3 of persons or persons and goods at risk of falling from a vertical height of more than three meters.18. Electronic units to ensure safety functions.22. Safe machines and fair competition, that is the objective.A Which products are covered by the Machines Directive?The Directive applies to the following product types.MachinesInterchangeable equipmentSafety componentsLifting accessories' Mechanical transmission devices' MountableStrings, belts and chains and partially completed machinery.Let's take a look at each of them in more detail.Machine A "mAquinaA" is defined as a set of joined parts or components from which at least one moves and joins for a specific application' equipped with a drive system other than human or animal effort applied directly. Fixation machines 3 powered by cartridges and other impact machines.19. Read this linked article to learn more about how 3 most products are allowed self-certification of CE marking.1. Internal control of the product o Auto certification of CE marking: The manufacturer performs the evaluation of compliance and documents evaluation by itself. same. rewoP gnittimsnart rof tnenopoc elbavomer a snaem AAAtecevid noissimsnart lacinahcem elbavomeRAAAe.seirossecca gnitfl ro yrenihcam gnitfl ro trap sa sesoprup gnitfl rof detcurtsnoc dna dengised gnibew dna sepor ,sniach snaem AAAegnibew dna sepor ,sniachAAAe.seirossecca gnitfl sa dedrager osla era stnenopmoc rieht dna sgnils tekram eht no decalp yltnednepedni si heilhw dna daol eht fo trap largetni na etuttisnoc ot dednetni si heilhw ro ,flesti daol eht no ro daol eht dna yrenihcam eht neewtob decalp si heilhw ,dleh eb ot daol eht gniwolla ,yrenihcam gnitfl eht ot dehcatta ton tnenmpuqe ro tnenopmoc a snaem AAAcyrossecca gnitflAAAe Aja()118 elcitra hitw enadrodca ni detadu eb yam heilhw ,eisbew lanretse na ot knil V xenna ni tuo tes si stnenopmoc ytefas fo tsil evilacidni nA .tekram eht no decalp gnibeh erofeb stucodp niatrec fo ylmrofnoC eht ssesa ot yrtnuoc UE na vb detangised noitsisnagro na si siht A AAAeydoy deifitnAAAe dellac-os ro ,ydob noitacifitrec ytrap-driht a evlovni ot deriugser si rerutacafunam eht ,sdradnats eseht ylppa ton did rerutacafunam eht heilhw rof ro ,elbalava era sdradnats dezimnrah naeporue on heilhw rof ,jevoba hpargarar eht ni nees sa ,evitcerD yrenihcam eht ot VI xenna ni detsil ,yrenihcam ksir rehgh rof ,ydoB deifitn A fo tnenevlovni .2.meht hitw detaicossa ksir lla eucder dna sdrazah dengingocer lla etanimile ot.Dedeen si noitcuder ksir fi enimreted dna ksir deifitnedi eht lla etaulave ot.Ecnerrucco fo ytilbaborp rieht dna ksir hitlah elbisop lla etamitse ot.Snoitautis suodrazah detaicossa lla hitw gnola ,deredisnoc dna deifitnedi era ,etareneg nac yrenihcam eht heilhw ,sdrazah lla erus ekam ot.Desus nehv yrenihcam eht fo stimil eht enimreted ot:Si tnenmessa ksir eht ot sdrager ni od ot deen srerutacafunam eht tabw ,yllausU.tnenmessa ksir eht fo stluser eht wollof tsum enihcam eht fo noitcurtsnoc dna ngised eht ,drawretFA .tuo deirrac si tnenmessa ksir a taht etnaraug tsum a self-propelled machine or a tractor and another machine joining them to the first fixed bearing. We will be happy to help. Manual trucks for the collection of household waste that incorporate a mechanism of purchase 3 n.14. Hopefully, this article has provided you a guide to start.We also invite you to read some other articles that may be of your interest.We understand that the requirements can be complex. The CE marking cannot be placed on partially completed machines.Basically, manufacturers can carry out the conformity assessment 3 two ways.The Directive on Machines (2006/42/EC) offers two ways to carry out the conformity assessment' A'self-certification' or A'self-declaration' against third-party 3. The possibility of machinery creating dangerous situations should be minimized or, better still, eliminated, Applications in which it is directly applied 3 human force may be machines intended to lift or lower loads; for example, a pulley is a machine. Interchangeable equipmentA means a device which, after putting into service a machine or a tractor, the operator assemblies with that machine or tractor to modify its function 3 or to attribute a new function' n, provided that the equipment is not. 'Safety componentA means a component that performs a safety function, which is placed on the market independently. 3 malfunction or failure of which endangers the safety of persons and which is not necessary for the operation of the machine, or whose normal components can be replaced for the operation of the machine. It also sets out the procedures for assessing conformity.Directives, regulations and marking standardsWhy has the European 3 adopted a regulation for machinery?The aim of the Machines Directive is to harmonize the essential requirements for and safety of the machines among all the Member States, members. States of the European 3 . In this Definitive Guide to the Directive of Machines 2006/42/EC find the answers to these questions and more. A How does 3 relate to the CE marking and product certification standards 3 the European ?? Safeguards for extra'able transmissions.16. Protective devices 3 to detect the presence of people.20. The Machine Directive, A© what is and 3 affects your business?The process is daunting and quite intimidating, considering that all your efforts can be in vain if you don't do it right. Learn why there is a Machines Directive, which it affects, what it's about and how 3 achieve EC conformity for mMachines.A What is the Machines Directive 2006/42/EC?The Machines Directive is a European Union directive on 3 and certain parts of mMachines: mandatory health and safety specifications are combined with voluntary harmonized standards. accessories, chains/ropes/fabrics, transmission devices' in extrable meCA nica and partially completed machinery.Directive 2006/42/EC deals with safety. Our team will be happy to help you.Other articles that may interest you: When marketed with the guard, it will be considered as a single product. A'Partially completed machineA' means that it is a quasi-mechanical assembly, but cannot by itself perform a specific application' Vehicle service lifts.17. Compliance is checked and enforced by market surveillance authorities in EU Member States. Semi-finished machines are'intended to be incorporated or assembled with other machines or other semi-finished machines or equipment, forming the machines to which the Directive applies.A© Products are exempt from the Machines Directive'Some types of machines and equipment are exempt Directive 2006/42 / EC. A drive system is a partially completed machinery. Circular saws (one or several sheets) to work with wood and similar physical characteristics or to work with meat and similar physical characteristics, of the following types: 1.1. Machines of sawing with fixed sheets or sheets during cutting, having a fixed bed or support with manual feeding of the workpiece or with removable electrical feeding; 1.2. Layer ranging machines with fixed sheets or sheets during cutting having a saw bench or a manual drive car; 1.3 maquin machines with fixed sheets or sheets during cutting, with a built-in mechanical power supply device For workpieces, with load and / or discharge manuals; 1.4. Machines of sawing with leaf or mobile sheets during the cut, with mechanical leaf movement, with load and / or discharge manuals. 2. Hand-fed surface brushing machines for working wood.3. Thickeners for the coating of a face with a built-in mechanical power supply device, with load and / or manual discharge for the machining of the wood.4. Tape saws with load and / or manual download, to work with wood and materials of similar physical characteristics or to work with meat and similar physical characteristics, of the following types: 4.1. Layouting machines with fixed sheets or sheets during cutting, having a fixed or reciprocal bed or support for the workpiece; 4.2. Machines saw with sheet or leaves mounted on a reciprocal movement car.5. Combined machines of the types mentioned at points 1 to 4 and 7 to work with wood and similar physical characteristics . 6. Hand-powered tenon machine with several tool holders for the machining of wood.7. Vertical Molding Machine Hand-powered for working with wood and materials with similar physical characteristics.8. Portable chainsaws for working wood.9. Presses, including brake presses, for working cold metals, with manual loading The discharge, whose 3 work parts can have a journey exceeding 6 mm and a speed exceeding 30 mm / s.10. Injection or compressionA n rubber molding machinery with manual loading or unloading.12. A conveyor belt, for example, is a machine in its own right. Right.
